Students are offered an opportunity to work on real-time projects in trending areas such as: AI, Big Data, Analytics, Machine Learning, Cyber Security, Machine Modernization, IT, IoT, Mobile Application Development.

### A truly unique experience

John Antony Keith Brown,  
University of Cambridge

During my internship I worked with R&D branch of Infosys to simulate a mapping robot using a specific depth sensing camera. Because I finished this project earlier than expected, I was able to extend it to incorporate some machine learning, by trying to develop an algorithm to optimise the mapping strategy. I was really pleased to be allowed to do this since it has given an amazing opportunity to learn more about machine learning and develop my skills in that area, which I'm sure will be useful in my future career. The Instep team work around the clock to make sure that you always have someone to contact if you have a problem, and have done their very best to make the virtual experience as engaging as possible. This internship is perfect for those who want to stretch themselves, whilst gaining valuable industry experience.

### Incredible Learning Opportunity

Brittney Lorraine Salama,  
IESE Business School

Infosys Instep helped me take my first career steps into the marketing world, and surrounded me with guidance in the form of many knowledgeable Infosys employees who were ready to help. My project involved me working directly with the CMO of the company, to research several use cases of AI in the B2B marketing realm and to suggest Infosys's entire marketing unit with recommendations for AI applications that would improve market efficiency and user experiences. This project allowed me to apply my findings to real-world use cases within the company. In addition to a fantastic work experience, I was also exposed to how different departments in Infosys work and how I could be a part of the organisation in a full-time capacity. I am grateful for the experience and support.

### About Infosys

Infosys is a global leader in next-generation digital services and consulting. Over 300,000 of our people work to amplify human potential and create the next opportunity for people, businesses, and communities. With over four decades of experience in managing the systems and workings of global enterprises, we expertly steer clients, in more than 50 countries, as they navigate their digital transformation powered by the cloud. We enable them with an AI-powered core, empower the business with agile digital at scale and drive continuous improvement with always-on learning through the transfer of digital skills, expertise, and ideas from our innovation ecosystem. We are deeply committed to being a well-governed, environmentally sustainable organization where diverse talent thrives in an inclusive workplace.
